SUMMARY

Product-minded software engineer who takes products from the first idea to a live release: requirements, UX, team leadership and code. 115 open-source pull requests merged since October 2026. I use Claude Code and LLM APIs across the whole product cycle. Open to relocation.

EDUCATION

B.Sc. in Software Engineering, Fırat University, Elazığ, Türkiye — Expected 2027

OPEN SOURCE

115 merged pull requests in 33 public repositories, including Grafana, Gitea, Nuxt, oxc and devenv; each with tests and maintainer review.

- repowise-dev/repowise (Python, TypeScript): 28 PRs in code ingestion, tsconfig references and HTTP route detection.
- stephenh/ts-proto (TypeScript): 17 PRs to the Protobuf-to-TypeScript generator, e.g. grpc-web async iterables.
- uutils/coreutils (Rust): 17 PRs fixing GNU compatibility in sort, od, join, split, csplit and nl.

EXPERIENCE

Product & Project Manager, Bi-Sevk (Bilkenler Lojistik A.Ş.) — Remote | May 2025 – Oct 2026

- Owned a logistics marketplace matching truck drivers with cargo owners: strategy, roadmap, requirements, UI/UX.
- Coordinated the web, admin and mobile apps (Kotlin, Spring Boot, MongoDB, React, Flutter), including real-time shipment tracking over WebSockets.

Freelance Web Developer, Tavuk da Tavuk — Elazığ, Türkiye | Mar 2026

- Designed and built a corporate website and QR menu platform for a restaurant, mobile-first and in daily use.

UI/UX Designer, FMD Education Portal (The Cans Group) — Remote | Jan 2025 – May 2025

- Designed the interface, information architecture and user flows of a management panel for a group of education institutions.

Product & Project Manager, Eyfel Kurye (Eyfel Yazılım) — Remote | May 2024 – Oct 2024

- Managed a restaurant and courier operations platform integrated with online ordering services: product design, UX and delivery.

AWARDS

1st Place (Elazığ), NASA International Space Apps Challenge — 2022

Built Wink to the Future, a Flutter app, in 48 hours with team Innosoft.
